2. You will receive an email notification that your NinerNET account is created.

3. Once you receive this notification, activate your account in PW Manager.

4. After your account is activated, you can begin using your NinerNET credentials to access email and other systems.

Info
Not all access is established immediately. Some systems, like card access and Library access, may be unavailable based on role or additional paperwork required at the employee’s start date.
