1. Log into your computer using your NinerNET username and password.
2. Click **Start**.
3. Click **Settings**.
4. Select **Devices**.
5. Click **Add a printer or scanner**.
6. A list of printers will be shown. Select your printer or scroll to the bottom and click **The printer that I want isn't listed** to manually set it up.
7. Select **Add a printer using a TCP/IP address or hostname** and click **Next**.
8. Select **TCP/IP Device** for **Device type**.
9. Enter the requested information and click **Next**.
   a. Leave the box checked that says **Query the printer and automatically select the driver to use**.
10. Click **Next**.
11. Select **Do not share this printer** and click **Next**.
12. Print a test page if desired, otherwise click **Finish**.

1. Log into your computer using your NinerNET username and password.
2. Click **Start**.
3. Click **Devices and Printers**.
4. Click in the upper left hand corner of the window. **Add Printer**
5. Click **Add a local printer**.
6. Select **Create a new port** and in the drop-down box, choose **Standard TCP/IP Port**.
7. Click **Next**.
8. Enter the network printer name of the network printer.
9. Leave the box checked that says **Query the printer and automatically select the driver to use**.
10. Select the manufacturer and model of the network printer; click **Next**.
11. Enter a printer name; click **Next**.
12. Select **Do not share this printer** and click **Next**.
13. Check the box if you want this printer to be your default printer and select if you would like to print a test page (recommended); click **Finish**.
