How do I update my university Windows computer to make sure it is not vulnerable to the Peyta Ransomware attack?

Tell Me

If a Windows computer has the latest security updates, the computer is not vulnerable. If a Windows computer has been turned off or not on the university network for some time, it may be at risk.

To manually install security updates - follow these steps. If off-campus, **connect to the VPN** first.

<table>
<thead>
<tr>
<th>Windows 7</th>
<th>Windows 10</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>1. Open the Control Panel</strong></td>
<td><strong>1. Type Control Panel in the search box in the bottom left toolbar</strong></td>
</tr>
<tr>
<td><strong>2. Click System and Security</strong></td>
<td><strong>2. Click on Control Panel</strong></td>
</tr>
<tr>
<td><strong>3. Click Configuration Manager at the bottom</strong></td>
<td><strong>3. Click System and Security</strong></td>
</tr>
<tr>
<td><strong>4. Click Configuration Manager at the bottom</strong></td>
<td><strong>4. Click Configuration Manager at the bottom</strong></td>
</tr>
<tr>
<td><strong>5. Click Action tab</strong></td>
<td><strong>5. Click Action tab</strong></td>
</tr>
</tbody>
</table>

1. Type in the search box in the bottom left toolbar
2. Click on Control Panel
3. Click System and Security
4. Click Configuration Manager at the bottom
5. Click Action tab
4. Click **Action** tab

5. Click **Machine Policy Retrieval & Evaluation Cycle**, click **Run Now** and then click **OK**

6. This message will show, click **OK**

7. Let the scan run, it will identify the updates that are needed
8. Follow the prompts to install updates, install immediately

8. Let the scan run, it will identify the updates that are needed

9. Follow the prompts to install updates, install immediately
