

How can I create recurring Zoom meetings for individual sections in my combined Canvas course?

Tell Me

You can create one link for a recurring Zoom meeting that you add to a Canvas page:

1. Login into the [Zoom Desktop Client](#)
2. Schedule recurring Zoom meetings (e..g Sept 7 to Dec. 15) per named section (Y01, Y02, 001, 080, etc.). You will see one Zoom session link for the fall semester per section
3. Add the link to Canvas:
 - If you want all students to attend, copy and Paste the respective Zoom session information to a page
 - If you have different sections and want each section to attend specific meetings:
 - Create Discussion Forums, for example, if you have 4 sections you will create 4 Discussion Forums
 - Copy and Paste the respective Zoom session information into the respective Discussion Forum associated with each section
 - Make the Discussion forum graded (Complete/Incomplete or points)
 - Assign it to the respective Sections
 - Make it available for the semester
4. Students will one see the Discussion form for the section they are enrolled
