

How do I fix “alt text for all img elements used as source anchors should not be empty” error using the Accessibility Checker (UDOIT)?

Tell Me

1. If you get this error, there are one or more linked images in your course which have no alt text (i.e. brief description of the image). Most commonly, this is caused when an image is added to course content through the Embed Image Button, nothing is entered in the Alt text field, and the image is then linked (or is made clickable).
 2. There is no U FIX IT! Button for this result. However, this result will be accompanied by the “image elements should have an ‘alt’ attribute” result (in the suggestion section), which will have a **U FIX IT!** Button. See [How do I fix “no alt text” image element suggestion using the Accessibility Checker \(UDOIT\)?](#)
